---

Dear Friends,

August 31, 2018

We hope everyone had an amazing summer ☺ It was a very late start but it turned into some hot, although smoky, weather! Hopefully our run of warm weather will continue through September, but eventually we need to think about winterizing.

This year Sari, Mel, and Jaimee were in the shop for the busy summer season. Mike is continuing to organize service. Len, Dennis, Gord, Joey, Todd, Matty, Mike and Jill have had a very busy summer in the field. We are very fortunate to have such a dedicated hard working team!

As of October 31<sup>st</sup>, we will be returning to our winter hours. Monday – Friday 9-5 and Saturdays 10-4. We are closed Sundays and stat holidays. Christmas hours will be posted on our website and instore.

We will be participating in the Fall Home Show on October 13 – 14, 2018 where we will be featuring both our Sundance Spas and H2O Spas. Visit us at our booth for more details!

Back to business, when thinking about winterizing your pool, keep in mind that your pool and equipment are going to be sitting for roughly the next seven to eight months and what you do now will greatly impact your spring opening. Remember that having your pool professionally winterized is a good insurance policy. One mistake can result in thousands of dollars' worth of damage.

A special note for all the customers with salt generators, it is **extremely** important to clean your salt cells! Your cell should be cleaned at least every three months. This will greatly extend the life of your cell, it is a small investment as compared to replacing your salt cell which can be up to \$1000. If you'd like we can deliver a salt cell stand and solution for you to clean the cell over the winter. When you call to book your winterizing please ask for this and let us know what brand of generator you have. Stain and Scale is also extremely important considering the corrosive nature of salt. It should be added prior to winterizing to coat and protect your equipment and liner.

As always we do not add chemicals while winterizing your pool. To properly diagnose which chemicals are needed we ask that customers bring their water in and add all winterizing chemicals **before** draining the pool. If the water isn't circulating neither are the chemicals. We look forward to seeing you in the coming weeks, on the reverse are some coupons to get you started☺

Some tips for closing down your pool:

- Bring in a water sample; properly balancing your water before your pool is winterized is extremely important as poor water balance can cause both corrosion and scale.
- Use Dazzle Rapid Action Filter Cleanse to clean your sand filter before draining the pool; this will ensure your filter is clean and ready for spring.
- When we come to winterize, please ensure all of your winter plugs are left next to your pump in the equipment area.

We will not be cleaning cartridge filters this fall. For those of you with cartridges you will need a container large enough to hold your filters (ie. garbage can or tote) you will rinse your filters off then soak in a filter cleaning solution.

This winter Len, Todd, & Gord will be taking care of service, with a combined 50 years' experience, there aren't many things they haven't seen. From routine maintenance to complete rebuilds we can take care of it all!

## Pleasure Pools Plus

746 Tagish Street  
Kamloops, BC V2H 1B7
